DETAILED ACTION

Acknowledgements

1. In view of the appeal brief filed on 5 December 2008, PROSECUTION IS HEREBY REOPENED. Allowance of application is set forth below.
2. Claims 1, 9 and 11 are remain pending.
3. This paper is assigned Paper No. 20090312 by the Examiner.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:
5. Regarding the claimed terms, the Examiner notes that a "general term must be understood in the context in which the inventor presents it." *In re Glaug*, 283 F.3d 1335, 1340, 62 USPQ2d 1151, 1154 (Fed. Cir. 2002). Therefore the Examiner must interpret the claimed terms as found on pages 1-23 of the specification. Clearly almost all the general terms in the claims may have multiple meanings. So where a claim term "is susceptible to various meanings, . . . the inventor's lexicography must prevail" *Id.* Using these definitions for the claims, the claimed invention was not reasonably found in the prior art.
6. The primary reference Patterson (U.S. Patent No. 6,389,541) ("Patterson") discloses as previously discussed in the Office Action mailed 3 September 2008, pages 8-10.

7. Patterson does not expressly disclose determining a position of a point pressed on a touch foil of an opto-touch foil aligned over or under a page of the copyrighted physical document, said page comprising a plurality of items, said point having been pressed to select an item of the plurality of items during illumination of the plurality of items by a light emitting foil of the opto-touch foil, said pressed point aligned proximate to the selected item.

8. The reference Bell et al. (US Pub. No. 2003/0130952) ("Bell") discloses determining a position of a point pressed on a touch foil of an opto-touch foil aligned over or under a page of the copyrighted physical document, said page comprising a plurality of items, said point having been pressed to select an item of the plurality of items during illumination of the plurality of items by a light emitting foil of the opto-touch foil, said pressed point aligned proximate to the selected item.

9. However, the Patterson/Bell combination fails to specially disclose determining a position of a point pressed on a touch foil of an opto-touch foil aligned over or under a page of the copyrighted physical document, said page comprising a plurality of items, said point having been pressed to select an item of the plurality of items during illumination of the plurality of items by a light emitting foil of the opto-touch foil, said pressed point aligned proximate to the selected item wherein the edited objects table comprises a header section and a body section, wherein the

header section comprises a Uniform Resource Locator (URL) of the edited objects server, a publication number of the physical document, a title of the physical document, an author of the physical document, a date of publication of the physical document, and an International Standard Book Number (ISBN) of the physical document, wherein the body section comprises a plurality of rows and three columns, wherein each row of the plurality of rows is specific to a copyrighted edited object, wherein the three columns consist of the item position column comprising a position of the edited object on the page, an item name column comprising a name of the edited object, and an edited object path column comprising either a file path to the edited object on the user workstation which denotes that the user has a license to use and/or copy the edited object or informing text indicating that the edited object does not exist on the user workstation which denotes that the user does not have the license to use and/or copy the edited object, wherein the edited object path column for at least one row of the plurality of rows comprises the file path to the edited object specific to each row of the at least one row, and wherein the edited object path column for each row of at least one other row of the plurality of rows comprises the informing text.

10. Yet even if the missing claimed elements were found in a reasonable number of references, a person of ordinary skill in the art at the time the invention was made would not have been motivated to include these missing elements in an embodiment in Patterson/Bell disclosure because: all of the above mention references are directed toward regulating access to

digital content but no suggestion about how to selecting, ordering, accessing and editing copyrighted information from physical document.

11. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
